

Skanska Property Czech Republic

We are an **innovative developer of green office buildings** that create a perfect environment for business development and provide their users with **healthy and friendly space** as well

as blending in perfectly with the surrounding urban tissue. The company has been operating in Czech Republic **since 1997**.

We are looking for:

Project Development Intern in Prague

As a Project development Intern you will **support a project team** on a daily basis. You will be part of a team responsible for an ongoing project of an **office building in Prague** with strong focus on three core areas.

- 1) **Project management** – support of the team in coordination with the general contractor, running tenders, internal agenda
- 2) **Sustainability** – each Skanska project is LEED certified which means support of the team in following the LEED and other internal sustainable requirements
- 3) **Health and Safety** – H&S is Skanska's top priority and is on our daily agenda. Meaning support of the project team to follow and implementation of H&S requirement on the site.

You will have an opportunity to work in a **diverse environment of an international company** with many colleagues who will support you and share the knowledge. What is essential is that you will work on **individual project** which will influence our business. **Share your perspective with us!**

We value your knowledge, skills and time and that's why our Interns are being paid.

You are a perfect candidate for us if you are:

- on your 4th or 5th year of studies – civil engineer/ architect
- open to diversity
- self-reliant and ambitious
- fluent in English, native Czech language
- a team-player with good communication skills
- familiar with MS Office

In case of satisfaction of both parties possibility of long-term cooperation.
